Certifications

PYTHON FOR EVERYBODY(UNIVERSITY OF MICHIGAN)

08/2018 to 29/2019

This Specialization introduces fundamental programming concepts including data structures, networked application program interfaces, and databases, using the Python programming language. In the Capstone Project, the technologies learned throughout the Specialization to design and create own applications for data retrieval, processing, and visualization.

DATA VISUALIZATION WITH TABLEAU(U.C DAVIS)

05/2019 to 16/2019

In this Specialization, learn how to generate powerful reports and dashboards that help people understand and draw insights from data. You will use Tableau, the leading software application in the field, to create high-impact visualizations of common data analyses, and apply predictive analytics to improve business decision making. The Specialization culminates in a Capstone Project in which you will use sample data to create visualizations,
